BackStop® Hydronic Expansion Tanks absorb the expansion pressure in residential or commercial hydronic (forced hot water) heating and cooling systems. Each tank is pressure rated up to 150 PSI and equipped with a carbon steel connection. High-grade, deep drawn steel is used for improved strength to weight ratio. This tank is not to be used for potable water systems.

BackStop® Well Tanks provide optimal control of pump performance by allowing efficient cycling, in turn, extending the life of the pump. Each tank is pressure rated up to 150 PSI and equipped with a solid stainless steel connection. High-grade rolled steel for improved strength-to-weight ratio. Larger models feature an attached steel base that is both rugged and stable.

LEAK DETECTORS

ProTekk Economy Leak Detector

- Superior over-center trip mechanism insures positive valve closure
- Easy to reset – No disassembly required, just drop in new activation cartridge
- Easily connects using Quick-Connect O-ring seal fittings for either 1/4" or 3/8" tubing
- Install anywhere a leak might occur using pre-molded mounting holes or supplied adhesive strips
- Locate anywhere, no electricity required
- Capture leaking water before damage occurs
